

Voyra Global Pvt. Ltd.

Business Requirement Document (BRD)

For CRM

1. Executive Summary

Voyra Global Pvt. Ltd. currently manages business operations using Google Sheet EOD reports. The existing process captures employee activities but does not provide real-time visibility into leads, clients, bookings, revenue or performance. The proposed CRM will become a centralized platform for Sales, Operations, Visa and Accounts with live dashboards, workflow automation and business reporting. The system will provide live dashboards, automated reminders, centralized client records, document management, employee performance tracking and real-time business reports.

2. Company Overview

Company: Voyra Global Pvt. Ltd.

Industry: Travel Services

Location: Bhopal

Employees: 20-50

Departments: Sales, Operations, Visa, Holiday Packages, Accounts, Marketing and Sales.

Services: Flight Booking, Hotel Booking, Visa, Passport, Holiday Packages and Sales

3. Project Objective

Replace manual Google Sheet tracking with a centralized CRM that enables real-time monitoring of every client, lead, booking, payment and employee. The CRM should improve accountability, increase conversions and provide management with live business insights.

4. Existing Business Workflow

Lead Source (Website / Phone / WhatsApp / Reference) → Lead Assignment → Customer Call → Requirement Analysis → Quotation → Follow-up → Booking Confirmation → Payment → Package/Ticket/Visa Processing → Invoice → Service Completion.

5. Current EOD Analysis

The current EOD records only activities performed by employees. It does not capture business outcomes. Management cannot determine which client was handled, the current lead stage, conversion rate, revenue generated or pending work.

6. Business Challenges

- Manual tracking of each employee work
- No single client history is available.
- Lead progress is not visible.
- Reports are prepared manually.
- Follow-ups are missed
- Employee productivity cannot be measured accurately.

7. Detailed Loopholes and CRM Solution

Loophole 1: No Real-Time Employee Tracking

Current Problem: Manual EOD updates with No details of each clients.

CRM Solution: Live employee dashboard with active tasks, leads, bookings and revenue.

Loophole 2: No Client-wise Tracking

Current Problem: Activities are not linked to specific clients.

CRM Solution: Unique client profile with complete history.

Loophole 3: No Lead Lifecycle

Current Problem: Management cannot identify lead stage.

CRM Solution: Track lead from New to Completed.

Loophole 4: No Lost Lead Reason

Current Problem: Business cannot analyse why leads are lost.

CRM Solution: Mandatory lost reason with analytics.

Loophole 5: Scattered Data

Current Problem: Client data exists across sheets and WhatsApp.

CRM Solution: Centralized CRM database.

Loophole 6: Missed Follow-ups

Current Problem: No reminder system.

CRM Solution: Automatic reminders and overdue alerts.

Loophole 7: Manual Reports

Current Problem: Daily reports require manual work.

CRM Solution: One-click dashboards and scheduled reports.

Loophole 8: No Accountability

Current Problem: Changes cannot be traced.

CRM Solution: Audit log recording user, time and action.

Loophole 9: Duplicate Clients

Current Problem: Same client entered multiple times.

CRM Solution: Duplicate detection

Loophole 10: No KPI Measurement

Current Problem: Targets and productivity are unclear.

CRM Solution: Employee KPI dashboard with conversion %, revenue and targets.

Loophole 11: No Revenue Visibility

Management cannot identify revenue generated by each employee or department.

Loophole 12. No Pending Payment Tracking

Outstanding payments are manually tracked.

Loophole 13. No Booking Status Tracking

Cannot identify confirmed, cancelled or pending bookings instantly.

Loophole 14. No Employee KPI Dashboard

Targets, conversions and productivity are not measured.

Loophole 15. No Notification System

Employees miss tasks and deadlines.

Loophole 16. No Standard Workflow

Different employees follow different processes.

8. Project Scope

• 1.1 Lead and Client Management

The CRM shall manage the complete lead lifecycle from lead creation to successful conversion or closure.

Features

- Capture leads from Website, WhatsApp, Phone Calls, Social Media, Walk-in, Reference and Other Sources.

The CRM shall manage the complete visa processing workflow.

Features

- Visa Application
- Country
- Visa Type
- Passport Details
- Document Checklist
- Appointment Date
- Biometrics
- Submission
- Approval
- Rejection
- Passport Return
- Visa Validity
- Visa Expiry Reminder

1.2.3 Holiday Package Management

The CRM shall maintain package booking information.

Features

- Client Details
- Destination
- Hotel
- Cab
- Meals
- Sightseeing
- Package Cost
- Selling Price
- Profit
- Number of Travellers
- Travel Date
- Voucher Upload

1.3 Accounts & Payment Tracking

- The CRM shall maintain all financial transactions.

Features

- Invoice Generation
- Payment Collection
- Pending Payments
- Partial Payments
- Refunds
- GST
- Vendor Payments
- Profit Calculation
- Commission Tracking
- Daily Revenue
- Monthly Revenue

9. Employee Performance Dashboard

The CRM shall monitor employee productivity and performance.

Features

- Leads Assigned
- Calls Made
- Follow-ups Completed
- Quotations Sent
- Bookings Done
- Revenue Generated
- Conversion %
- Pending Tasks
- Overdue Tasks
- Daily Performance
- Monthly Target
- Target Achievement

10. Dashboard and Analytics

The CRM shall provide live dashboards for Management.

Dashboard

- Today's Revenue
- Monthly Revenue
- Yearly Revenue
- Total Bookings
- Total Active Clients
- Total Leads
- Total Lost Leads
- Overall Lead Conversion Rate
- Average Booking Value
- Gross Profit
- Net Profit
- Work status of each employee

10.2 Lead Analytics

Management should be able to monitor the complete lead pipeline.

- Today's Leads
- New Leads
- Assigned Leads
- Pending Leads
- Follow-ups Due Today
- Overdue Follow-ups
- Quotation Sent
- Booked Leads
- Lost Leads
- Lead Source Analysis
- Lead Conversion %
- Lead Ageing Report

10.3 Department Performance

The dashboard should display department-wise performance.

Departments:

- Sales
- Operations

- Visa
- Holiday Packages
- Accounts

For each department display:

- Total Work Assigned
- Work Completed
- Pending Work
- Revenue Generated
- Conversion Rate
- Employee Performance
- Department Productivity

10.4 Employee Performance

The dashboard should display employee-wise performance.

- Employee Name
- Leads Assigned
- Calls Made
- Follow-ups Completed
- Quotations Sent
- Bookings Completed
- Revenue Generated
- Pending Tasks
- Conversion %
- Target Achievement %

10.5 Operations Dashboard

Management should be able to monitor travel operations.

- Upcoming Travel
- Today's Flight Bookings
- Pending Flight Bookings
- Cancelled Bookings
- Upcoming Hotel Check-ins
- Upcoming Hotel Check-outs
- Pending Holiday Packages
- Service Completion Status

10.6 Visa Dashboard

Management should be able to track visa processing.

- Total Visa Applications
- Documents Pending
- Appointment Scheduled
- Biometric Pending
- Submitted Applications
- Approved Visas
- Rejected Visas
- Passport Collection Pending
- Passport Returned
- Visa Expiry Alerts

10.7 Accounts Dashboard

Finance-related information should be available in real time.

- Today's Collection
- Monthly Collection
- Pending Payments
- Advance Payments
- Partial Payments
- Vendor Payments
- Refund Requests
- GST Summary
- Profit Analysis
- Commission Report
- Cash Flow

10.8 Customer Insights

Management should be able to understand customer trends.

- New Customers
- Repeat Customers
- Corporate Clients
- Customer Satisfaction
- Frequently Visited Destinations
- Most Popular Packages

11. Reports

The CRM shall generate reports automatically.

Reports

- Employee Report
- Department Report
- Revenue Report
- Lead Report
- Conversion Report
- Pending Payment Report
- Visa Report
- Booking Report
- Flight Report
- Holiday Package Report
- Profit Report

12. User Roles and Expectations

Stakeholder	Role in Organization	Responsibility	Expectation from CRM
Management	Business Head	Overall business monitoring, strategic decisions	Real-time dashboard, revenue tracking, employee performance, department-wise reports, profit analysis, pending payments
Sales Team	Lead Generation and Conversion	Contact prospects, qualify leads, share quotations, convert leads into bookings	Easy lead management, follow-up reminders, quotation history, conversion tracking
Operations Team	Booking Execution	Flight, hotel and travel bookings after payment confirmation	Centralized booking details, travel calendar, PNR management, booking status tracking
Visa Team	Visa Processing	Process visa applications and update status	Document checklist, appointment tracking, visa status updates, passport tracking
Accounts Team	Financial Management	Payment, invoices, GST, refunds, commissions	Invoice generation, pending payment tracking, profit reports, GST reports

13. User Roles & Permissions

Role	Access	Can View	Can Edit
Management	Full	All modules and reports	Everything
Sales	Limited	Own leads and clients	Own records
Operations	Limited	Bookings and clients	Bookings
Visa	Limited	Visa cases	Visa details
Accounts	Finance	Payments and invoices	Financial records

14. Business Rules

- Every lead must be assigned to one employee.
- Each client should have a unique profile.
- Lost leads require a mandatory reason.
- Follow-up date is mandatory after every interaction.
- Completed bookings cannot be deleted.
- Only Management can delete records.
- Accounts can modify payment details only.
- Every update should create an audit log.

15. Dashboard Requirements

- Management Dashboard: Revenue, Leads, Conversion %, Pending Payments, Upcoming Travel, Pending Visa, Department Performance, Individual Employee performance and Status, Cash Flow, pending work, overdue follow-ups, bookings and revenue.
